

Presenting author	Title	Day	#
Poster Session I Tuesday 28.7.2015			
<i>Apostolos G. Marinopoulos</i>	Electrical levels and diffusion barriers of early 3d and 4d transition metals in silicon	TUE	1
<i>Baodan Liu</i>	Defect controlling in epitaxial GaN nanowire arrays	TUE	2
<i>Leonid Skatkov</i>	Role of metal impurities in generation of defects in anodic semiconductor layers Nb ₂ O ₅	TUE	3
<i>Roman Yatskiv</i>	Effect of annealing on the morphology and optical properties of hydrothermally grown ZnO nanorods	TUE	4
<i>Seunghyun Lee</i>	Three-dimensional selective growth and defects evaluation of GaN nanorods	TUE	5
<i>Friederike Zimmermann</i>	Transition metal related photoluminescence in HVPE-GaN	TUE	6
<i>Juan Jose Melendez</i>	Hydrogen incorporation to indium oxide: defect and electronic structure	TUE	7
<i>Hassan El idrissi</i>	Characterization of the metal insulator transition in thin Ni _x Si _{1-x} films	TUE	8
<i>Ezekiel Omotoso</i>	Electrical characterization of defects introduced during electron beam deposition of W Schottky contacts on <i>n</i> -type 4H-SiC	TUE	9
<i>Chanbin Lee</i>	The properties of graded AlGaIn epilayer grown by HVPE	TUE	10
<i>Chanmi Lee</i>	Initial growth mode of AlGaIn on patterned sapphire substrates by using HVPE	TUE	11
<i>Akira Kiyoi</i>	Annealing kinetics of hydrogen-related donor states and self-interstitial clusters in proton implanted <i>n</i> -type silicon	TUE	12
<i>Yutaka Ohno</i>	Nanosopic segregation mechanism of impurity atoms at Σ9{114} grain boundaries in silicon crystals	TUE	13
<i>Yutaka Ohno</i>	Near-field light probe towards in-situ Raman spectroscopy under transmission electron microscopy	TUE	14
<i>Martin Faccinelli</i>	Investigation of defect complexes in silicon generated by high dose proton implantation	TUE	15
<i>Jiri Kujala</i>	Vacancies in silicon nanocrystals	TUE	16
<i>Yasemin Caglar</i>	Fabrication and electrical characteristics of Al/ <i>p</i> -ZnO:Sb Schottky diode	TUE	17
<i>Saliha Ilican</i>	Effect of antimony dopant on structural and electrical transport properties of ZnO films deposited by sol gel	TUE	18
<i>Matthew P Halsall</i>	Erbium photoluminescence dynamics in the presence of size controlled silicon nano-crystals	TUE	19
<i>Denis Demchenko</i>	Green luminescence bands: the case of multiple charge state defects in GaN	TUE	20
<i>Daiki Deguchi</i>	Ab initio assessment of sustainable photovoltaic materials	TUE	21
<i>Naohisa Inoue</i>	Infrared defect dynamics – nitrogen-vacancy complexes introduced by electron irradiation	TUE	22

<i>Jan Grym</i>	High quality ZnO thin films prepared by electrophoretic deposition	TUE	23
<i>Naoki Fukata</i>	Hybrid SiNW-based solar cell fabrication and efficiency enhancement by H ₂ annealing	TUE	24
<i>Naoki Fukata</i>	Characterization of selective doping and stress in Si/Ge and Ge/Si core-shell nanowires	TUE	25
<i>Shengbai Zhang</i>	“Shallow” acceptors in ZnO	TUE	26
<i>U Ishiyama</i>	Competition and cooperation between external and internal electric fields for carrier injection in carbon nanotubes with defects	TUE	27
<i>Kohei Narita</i>	Geometric and electronic structures of graphene nanoribbon with topological defects: corannulene polymers	TUE	28
<i>Der-Sheng Chao</i>	Characteristic investigation of radiation-induced lattice defects in neutron transmutation-doped silicon	TUE	29
<i>Gudrun Kissinger</i>	On the impact of geometry, temperature, and materials parameters on the strain energy of oxygen precipitates	TUE	30
<i>Victor Leca</i>	Positron spectroscopy analytical methods at ELI-NP	TUE	31
<i>Ronald Stübner</i>	Different configurations of the carbon-hydrogen complex in Si: a Laplace deep level transient spectroscopy study	TUE	32
<i>Denis Gryaznov</i>	Hybrid density-functional calculations on oxygen vacancy behavior in complex perovskite oxides	TUE	33
<i>Dmitry V. Azamat</i>	Spin-lattice relaxation processes of transition metal ions in ZnO	TUE	34
<i>Miguel Sequeira</i>	Quantum well intermixing in InGaN/GaN structures	TUE	35
<i>Mehmet B Bebek</i>	Heat flow and delta-layers in Si nanowires	TUE	36
<i>Kaihei Inoue</i>	On the impact of Sn-doping on formation of oxygen clusters in Ge crystals	TUE	37
<i>Serdar Delice</i>	Low- and high-temperature thermoluminescence in TlGaS ₂ semiconductor crystals	TUE	38
<i>Belal Abdel Rahman Salameh</i>	Effect of fluorine doping on the properties of spray deposited Zinc Tin Oxide (ZTO) thin films	TUE	39
<i>Sunghyun Kim</i>	Finite-size supercell correction scheme for the formation energy of charged defects in silicon nanowires	TUE	40
<i>Seval Aksoy</i>	Effect of Fe doped on structural, morphological and optical properties of ZnO film deposited by sol gel	TUE	41
<i>Chioko Kaneta</i>	Electronic properties of B and/or P doped Si quantum dots	TUE	42
<i>Thomas Neset Sky</i>	Aluminium in zinc oxide: the interplay with zinc vacancies	TUE	43
<i>Kalju Lott</i>	Chemical diffusion in ZnO: difference between isotherms and isobars	TUE	44
<i>Magnus Wagener</i>	Bias modulated photo-capacitance spectroscopy of solar cells containing embedded quantum structures	TUE	45
<i>Lars Bjaalie</i>	Defects and polarons in rare-earth titanates	TUE	46

<i>Muhammad Asghar Hashmi</i>	Growth of silicon germanium nanowires by physical vapor deposition	TUE	47
<i>Muhammad Asghar Hashmi</i>	Growth and characterization of 4H-SiC by thermal evaporation system using single boat	TUE	48
<i>Md Julkarnain</i>	Below-gap recombination channels in GaN revealed by two-wavelength excited photoluminescence	TUE	49
<i>Morteza Habibi</i>	Investigation of laser diode damage due to fast neutrons and X-ray emitted by a 4kJ plasma focus device	TUE	50
<i>Brahim El Filali</i>	Comparative study defect related photoluminescence in ZnO and ZnO Cu nanocrystals obtained by spray pyrolysis and anodization methods	TUE	51
<i>Jun-Young Jeon</i>	Study on the density of trap states in semiconductors	TUE	52
<i>Hiroshi Ogata</i>	Investigation of the electrical properties of carbon doped Si _{0.75} Ge _{0.25} /Si hetero junction diodes by 2 MeV electron irradiation	TUE	53
<i>Alexander Y. Polyakov</i>	Characteristics of UV LEDs grown by HVPE	TUE	54
<i>Stefan Kayser</i>	Novel study of lateral photovoltage scanning (LPS) and scanning photoluminescence (SPL) method	TUE	55
<i>Kezzoula Faouzi</i>	Aluminum-induced crystallization of amorphous silicon type P: influence of annealing temperature	TUE	56
<i>Tadeusz Wosinski</i>	Extended defects in MBE-grown CdTe-based heterojunctions for solar cell applications	TUE	57
<i>Vadim V. Emtsev</i>	Scattering of charge carriers in floating-zone <i>n</i> -type silicon subjected to fast electron irradiation: a new defect-dependent component	TUE	58
<i>Nora Marita Wilson</i>	Trap-assisted recombination in polymer solar cell materials	TUE	59
<i>Olena Churiukova</i>	Thermal conductivity of heavily doped bulk crystals GaN:O	TUE	60
<i>Ju Hee Lee</i>	Study of defects in III-V semiconductor materials (InP, GaAs, InGaAs/ InP on Si) in nano-sized patterns	TUE	61
<i>Kenichiro Takakura</i>	Radiation hardness of electrical properties of <i>n</i> -channel UTBOX SOI MOSFETs by 2 MeV electron irradiation	TUE	62
<i>Jeffrey Colin McCallum</i>	Atomic transport during solid phase epitaxial regrowth of amorphous germanium	TUE	63
<i>Chidanand Bhoodoo</i>	Formation kinetics of a deep acceptor-like level in helium-implanted ZnO	TUE	64
<i>Zeljko Pastuovic</i>	Charge collection efficiency in semiconductor diodes irradiated by a raster scanned light ion microbeam: experiments and modelling	TUE	65
<i>Florence Linez</i>	In-situ positron lifetime measurements of defects induced by 10 MeV-H ⁺ irradiation at 30 K in 3C- and 6H-SiC	TUE	66
<i>Hikari Shinya</i>	The origin of high thermoelectric efficiency in (GeTe) _x (AgSbTe ₂) _{1-x} from the viewpoints of structural stability	TUE	67

<i>Edward Steinman</i>	The deformation induced defects in ^{29}Si and their possible application for cubit technology	TUE	68
<i>Mukesh Kumar</i>	Studies of neutral and charged point defects in BaSi_2	TUE	69
<i>Esa Korhonen</i>	Electrical compensation by Ga vacancies in Ga_2O_3	TUE	70
<i>Milko Jaksic</i>	Kinematics of radiation induced defects in silicon and diamond studied by nuclear microprobe technique IBIC	TUE	71
<i>Kai Nordlund</i>	Defects in amorphous Si: variability of atomic-level structure of a-Si prepared in different experimental and computational ways	TUE	72
<i>Päivikki Repo</i>	Silicon surface passivation with atomic layer deposited aluminum nitride	TUE	73
<i>Marc A. Gluba</i>	Multi-barrier diffusion of zinc and oxygen on polar and non-polar zinc oxide surfaces	TUE	74
<i>Frank Herklotz</i>	IR spectroscopy of a complex containing three equivalent O-H bonds in ZnO	TUE	75
<i>Vasily Zubkov</i>	Boron acceptor level modification in CVD diamonds of various impurity concentration observed by admittance spectroscopy	TUE	76
<i>Janne-Petteri Niemelä</i>	Thermal conductivity suppression via phonon-boundary scattering from organic monolayers in inorganic-organic superlattices	TUE	77
<i>Marilia J. Caldas</i>	Morphological disorder and the electronic structure of conjugated polymer films	TUE	78
<i>Elif Ertekin</i>	Defect and bulk properties of semiconducting materials from quantum Monte Carlo methods	TUE	79
<i>Yin-Yu Chen</i>	Effect of thermal annealing on photoluminescence of Si^+/C^+ -implanted SiO_2 films	TUE	80
<i>Mary Ellen Zvanut</i>	Incomplete charge transfer in Si GaN:Fe	TUE	81
<i>Andrey Ilinov</i>	Understanding mechanisms of Si surface nanostructuring	TUE	82
<i>Tetsuya Yamamoto</i>	Indium codoping of gallium-doped ZnO highly transparent conductive films to achieve high moisture resistance	TUE	83
<i>Yu-ichiro Matsushita</i>	First-principle calculation for a mechanism of carbon annihilation during the SiC oxidation	TUE	84
<i>Ichiro Yonenaga</i>	Recombination characters of defects in PV-Si obtained by high resolution PL imaging	TUE	85
<i>Ichiro Yonenaga</i>	Photoelastic observation of stress distribution around indentation-impressions in ZnSe	TUE	86
<i>Ichiro Yonenaga</i>	Abnormal diffusivity of oxygen in Si at low temperatures	TUE	87
<i>Ichiro Yonenaga</i>	Dislocation conduction in deformed GaN	TUE	88
<i>Ichiro Yonenaga</i>	Enhanced diffusion of Mn in heavily dislocated region of Si	TUE	89
<i>Genki Kobayashi</i>	Synthesis and properties of H ⁻ defects oxyhydrides	TUE	90
<i>Martin Albrecht</i>	In-situ observation of small polarons in β -Gallium oxide by aberration corrected high resolution	TUE	91

<i>Phuti Ngako Mahloka Ngoepe</i>	DLTS characterization of defects in GaN introduced by electron beam exposure	TUE	92
<i>Flyura Djurabekova</i>	Tracks and voids in amorphous Ge Induced by swift heavy-ion irradiation	TUE	93
<i>Sharon May-Tal Beck</i>	A novel PALS experimental method and its application in a study of irradiated Sapphire	TUE	94
<i>Geoffroy Hautier</i>	Electronic structure and defect properties of B ₆ O as a potential novel <i>p</i> -type transparent conductor	TUE	95
<i>Vera Prozheeva</i>	Identification of Be _{Ga} in GaN with positron annihilation	TUE	96
<i>Riley E. Brandt</i>	First-principles screening of defect-tolerant semiconductors for optoelectronic applications	TUE	97
<i>Janne Heikinheimo</i>	Initial analysis of the positron annihilation characteristics of MgAl ₂ O ₄ spinel	TUE	98
<i>Delr Adil Jameel</i>	Effect of substrate orientation on the electrical properties of polyaniline deposited on GaAs (100) and (311)B <i>n</i> -type	TUE	99
<i>Theresa Marie Christian</i>	Magnetic field-induced direct--indirect crossover in Al _x Ga _{1-x} As	TUE	100
<i>Kuan Kan Hu</i>	Phosphorus diffusion in sub-micron ion-implantation template: Effects of end of range defect evolutions	TUE	101
<i>Alnazer Mohamed</i>	An approach model to study ultra-low resistance source/drain contacts scheme for III-V NMOS	TUE	102
<i>Sourabh Singh</i>	Tuning the Fermi level in topological insulator thin films by double target pulse laser deposition	TUE	103
<i>Takashi Aoyama</i>	Infrared-light assisted plasma CVD graphene-like films	TUE	104
<i>Mohammad Amirabbasi</i>	A theoretical investigation on the growth method effect on electrical transport properties in pure monocrystalline ZnO layers	TUE	105
<i>Yahor V. Lebiadok</i>	Influence of vacancies on the AlN/GaN interface characteristics	TUE	106
<i>Tiago Á. Oliveira</i>	Electrical and structural properties of nanoscale MoSi ₂ precipitates in silicon: an ab initio study	TUE	107
<i>Bakhysh Bairamov</i>	Optical properties of dual-type nanowire arrays	TUE	108
<i>Jeanette Lindroos</i>	Illumination of near-surface copper contamination in silicon	TUE	109
<i>Oleg Vyvenko</i>	Raman spectroscopy of hydrogen at dislocations in silicon	TUE	110
<i>Tanja Heikkinen</i>	Vacancy-hydrogen complexes in ammono-acidic GaN	TUE	111
<i>Antti Karjalainen</i>	The design of a positron microscope	TUE	112
<i>Paula Giudici</i>	Optical investigation of damage profile in proton-irradiated III-V compounds	TUE	113
<i>Mujdat Caglar</i>	XRD and SEM studies of the nanostructure ZnO films deposited by microwave assisted chemical bath deposition method	TUE	114

Poster Session II Thursday 30.7.2015

<i>Ivana Capan</i>	Study of Si-SiO ₂ interface related defects: the influence of neutron irradiation	THU	1
<i>Jean-Michel Rey</i>	Positron generator developments for defect analysis dedicated to Materials Science Laboratories	THU	2
<i>Deren Yang</i>	Suppression of boron-oxygen defects in Czochralski silicon by carbon co-doping	THU	3
<i>Maria Khorosheva</i>	Interaction of nickel and gold atoms with dislocations and vacancy defects generated by motion of dislocations in silicon	THU	4
<i>Yu Liu</i>	Ferromagnetism induced by vacancy clusters in silicon	THU	5
<i>Teimuraz Mchedlidze</i>	Degradation of solar cells during electroluminescence	THU	6
<i>Naotaka Uchitomi</i>	Room-temperature ferromagnetic properties of InMnAs thin films grown on InP	THU	7
<i>Abdelhamid El kaaouachi</i>	Study of the electrical behavior of Au-GaAs Schottky diodes irradiated by protons at room temperature	THU	8
<i>Daniel Kropman</i>	Stress relaxation by strain in the Si-SiO ₂ system and its influence on the interface properties	THU	9
<i>Leonid Vlasenko</i>	Dynamic nuclear polarization and selective detection of ²⁹ Si nuclear spins near phosphorus donors in silicon	THU	10
<i>Leonid Vlasenko</i>	Properties of the excited triplet states of point defects in silicon	THU	11
<i>Katharina Lorenz</i>	Defects introduced by ion implantation in non-polar GaN	THU	12
<i>Koun Shirai</i>	Structure of vacancies in Gd-doped GaN and its detection by XANES spectra	THU	13
<i>Eugene B. Yakimov</i>	Radiation enhanced dislocation glide in GaN	THU	14
<i>Eugene B. Yakimov</i>	CL and EBIC investigations of stacking faults in 4H-SiC introduced by indentation	THU	15
<i>Alexander A. Lebedev</i>	Linear and nonlinear processes in irradiation of lightly doped 4H-SiC	THU	16
<i>Emmanuel Igumbor</i>	Ab initio studies of self interstitials (Mg _i and Te _i) MgTe wide-gap semiconductor	THU	17
<i>Byung-Sub Kang</i>	Influence of defect on ferromagnetism of Mn-doped chalcopyrite AlGaP ₂ semiconductor	THU	18
<i>Kazunori Sato</i>	Clustering tendency and change in ferromagnetism of (Ga, Mn)As and (In, Mn)As	THU	19
<i>Lyudmyla Khirunenko</i>	Boron-related radiation defects in silicon	THU	20
<i>Alvaro Lopez Cazalilla</i>	Nanoripple production on a-Si surface under Ar irradiation	THU	21
<i>Fikry El Akkad</i>	Study of luminescence emission from the surface depletion layer of ZnTe films using photo-excitation spectroscopy: Role of the Z-center	THU	22

<i>Ching-Hwa Ho</i>	Structure and optical property of III-VI M_2S_3 (M=Ga, In) defect semiconductors	THU	23
<i>Ville Havu</i>	Origin of band gap bowing in dilute $GaAs_{1-x}N_x$ and $GaAs_{1-x}Bi_x$ alloys	THU	24
<i>Ayaka Yamanaka</i>	Energetics and electronic structure of graphene edges	THU	25
<i>Mina Maruyama</i>	Magnetic properties of graphene flakes embedded in h-BN sheet	THU	26
<i>Angelo Rafael Costa</i>	Lattice location of implanted ^{56}Mn in 3C-SiC	THU	27
<i>René Wutzler</i>	III-V nanocrystals in silicon via liquid phase epitaxy: Microstructure and related properties	THU	28
<i>Julia Gusakova</i>	Efficient DFT method for calculating band-gap and deep levels in semiconductors	THU	29
<i>Mihai Danila</i>	Defects network and transport properties in electron-doped $Sr_{1-x}La_xCuO_2$ thin films grown by laser ablation	THU	30
<i>Michael Knetzger</i>	Investigations of critical structural defects in active layers of GaN-on-Si for power devices	THU	31
<i>Antoine Pacco</i>	Wet defect etching for defect reveal in epitaxial Ge	THU	32
<i>Bernd Jenichen</i>	GaAs/Fe ₃ Si core/shell nanowires on Si(111)	THU	33
<i>Bernd Jenichen</i>	Surface relief caused by dislocations in GaN epitaxial films	THU	34
<i>Nikolay Bagraev</i>	Optically detected cyclotron resonance in heavily boron doped silicon nanostructures on <i>n</i> -Si (100)	THU	35
<i>Nikolay Bagraev</i>	Negative U centers for qubit architecture	THU	36
<i>Philip Weiser</i>	Low-frequency excitations of the 3326 cm^{-1} OH center in ZnO	THU	37
<i>Woo Huyn Han</i>	Electronic structure of oxygen interstitial defects in amorphous In-Ga-Zn-O semiconductors	THU	38
<i>Hussein Mohammed Ayedh</i>	Annihilation of carbon vacancies in 4H-SiC epi-layers by near-surface implantation of C, Al and Si ions	THU	39
<i>Paulo David Santos</i>	First-principles calculations of electrical and dynamical properties of interstitial fluorine complexes in silicon	THU	40
<i>Yufeng Li</i>	Nucleation mechanism of GaN growth on nano-patterned sapphire substrate	THU	41
<i>Geun-Myeong Kim</i>	The effect of Al impurities on the effective work function at metal/HfO ₂ interfaces	THU	42
<i>Rodica Plugaru</i>	Study of point defects in ZnO thin films irradiated with alpha particles	THU	43
<i>Konrad Bellmann</i>	Selective GaN QD nucleation on low defect density ELO AlN (0001)	THU	44
<i>Jan E. Stehr</i>	Surface and interfacial defects in coaxial GaNP nanowires	THU	45
<i>Patrick W. Mengyan</i>	Magnetism and muon dynamics in VO ₂ compounds	THU	46
<i>Fabien Massabuau</i>	The impact of trench defects in InGaN/GaN light emitting diodes and implications for the “green gap” problem	THU	47

<i>Igor Krainov</i>	Resonant indirect exchange interaction in graphene	THU	48
<i>Leonid Makarenko</i>	Recombination enhanced formation and annealing of boron-oxygen complex in alpha-irradiated <i>p</i> -type silicon	THU	49
<i>Aaron Israel Diaz Cano</i>	Optical and structural study of Ag-doped ZnO nanostructures grown by spray pyrolysis	THU	50
<i>Hugo Pinto</i>	Diffusion of nitrogen in diamond and the formation of A-centres	THU	51
<i>Francesco Biccari</i>	Optical characterization of site-controlled quantum dots obtained by hydrogenation of Ga(AsN)/GaAs quantum wells	THU	52
<i>Alexander Hupfer</i>	Formation and evolution of E3 centers in deuterium and hydrogen implantated hydrothermally grown zinc oxide	THU	53
<i>Caleb D. Corolewski</i>	Lithium acceptors and hydrogen in zinc oxide	THU	54
<i>Norihiko Kamata</i>	Trap centers and photostimulated-luminescence in Ba ₃ Si ₆ O ₁₂ N ₂ :Eu ²⁺ phosphor revealed by below-gap excitation	THU	55
<i>Norihiko Kamata</i>	Optical study on solution-processed organic thin films of energy donor-acceptor pair molecules	THU	56
<i>Vladimir P. Markevich</i>	Calibration factors for the determination of oxygen-vacancy complexes and oxygen dimer concentrations in silicon by infrared absorption	THU	57
<i>Jacques Botsoa</i>	Positron annihilation study of defects induced by heavy ion irradiation in GaN	THU	58
<i>Thomas Auzelle</i>	The origin of 3.45 eV luminescence in GaN nanowires	THU	59
<i>Dmytro I. Bletska</i>	The influence of Sb and Bi impurities on the electronic structure and photoelectric properties of GeS and SnS layered crystals	THU	60
<i>Sun-Wook Kim</i>	Strain characterization in FinFETs with SiGe deposited source/drain	THU	61
<i>Eduard Danilovskii</i>	Sulfur passivation of semi insulating GaAs: transition from Coulomb blockade to electron tunneling regime	THU	62
<i>Ramin Yousefi</i>	Effects of planar defects on formation of ZnO nanorings	THU	63
<i>Vladimir Kolkovskiy</i>	Influence of annealing in H atmosphere on the electrical properties of Al ₂ O ₃ layers grown on <i>p</i> -type Si by the atomic layer deposition technique	THU	64
<i>Hiroyasu Nakata</i>	Infrared absorption by interface transition between InN and Si	THU	65
<i>Nikolay Arutyunov</i>	Phosphorus-multivacancy defects in proton-irradiated silicon: VPV complex	THU	66
<i>Abderrahmane Boughelout</i>	Optical properties a function of oxygen pressure of ZnO thin films deposited by sputtering DC	THU	67
<i>Akira Masago</i>	Circularly polarized luminescence in Eu-doped GaN	THU	68
<i>Christian Ahläng</i>	2-dimensional drift-diffusion simulations of organic solar cells	THU	69
<i>Khrystyna Levchenko</i>	Structural and magnetic properties of (Ga,Mn)(Bi,As) thin epitaxial films	THU	70
<i>Soumaya Latrach</i>	Comparison of methods for accurate characterization of interface traps in AlGaN/GaN and AlInN/GaN heterostructures	THU	71

<i>Roger L. Lichti</i>	Energy level determination for band-resonant defects: Mu- in Si-Ge alloys	THU	72
<i>Tetsuya Fukushima</i>	Materials design of magnetic phase change materials by order-N screened Korrington-Kohn-Rostoker Green's function method	THU	73
<i>Hannu-Pekka Komsa</i>	Electrostatic energy corrections for charged defects in low dimensions	THU	74
<i>Henri Vahlman</i>	Strong copper-related light-induced degradation in quasi-mono silicon solar cells	THU	75
<i>Aleksey V. Shestakov</i>	Investigation of HgSe:Fe by magnetic resonance method	THU	76
<i>Vladimir Privezentsev</i>	Nanoparticle formation in high fluence and low energy $^{64}\text{Zn}^+$ ion implanted Si	THU	77
<i>Xuan Sang Nguyen</i>	Deep level traps in GaN light-emitting diodes grown by MOCVD on 8 inch Si (111) substrate	THU	78
<i>Noor Alhuda Ahmed Al Saqri</i>	Investigation of the effect of gamma irradiation on deep levels in GaAs _x N _{1-x} with different nitrogen concentration using DLTS	THU	79
<i>Danny Broberg</i>	Intrinsic point defects in thermoelectric materials: a computational study of SnSe	THU	80
<i>Hans Jurgen von Bardeleben</i>	Dynamic nuclear polarization and CESR bistability in alpha-Ga ₂ O ₃	THU	81
<i>Tai-Hsiang Chen</i>	Investigation of doping properties and lattice defects in neutron transmutation-doped germanium	THU	82
<i>Thu Trang Trinh</i>	Apparatus for in-situ defect analysis (AIDA): investigations by positron annihilation spectroscopy	THU	83
<i>Ana Maria Valencia</i>	First principle study of hydrogen impurities on graphene nano-flakes	THU	84
<i>Jaeseong Kim</i>	Study on properties of SWNT FET sensors using defect-functionalized SWNT surfaces	THU	85
<i>Ville Polojärvi</i>	Defects determining the GaInNAs solar cell performance	THU	86
<i>Chikara Shinei</i>	Magic number of multi-vacancies and their electronic structure in silicon carbide	THU	87
<i>John D. Murphy</i>	Reaching the limit of minority carrier lifetime in p-type Czochralski silicon: the effect of nitrogen impurities	THU	88
<i>Anton A. Konakov</i>	Spin-orbit splitting of the ground state for shallow donors in silicon: quantitative analysis	THU	89
<i>Michel Bockstedte</i>	Spin physics of vacancy-related defects in silicon carbide	THU	90
<i>Brittany Beth Baker</i>	Muonium diffusion in transparent conducting oxides	THU	91
<i>Martin S. Brandt</i>	Hydrogen-related donors in silicon	THU	92
<i>Mads Eide Ingebrigtsen</i>	X-ray induced variations in the depletion capacitance correlating with K-shell transitions of defect constituting impurities: testing iron in silicon	THU	93
<i>Andreas Schramm</i>	Influence of defects on optical and electrical properties of site-controlled InAs quantum dots	THU	94

<i>Roman Demediuk</i>	The effect of temperature and background impurity in the barriers on the binding energy of the same delta-doped impurity in <i>n</i> -type quantum well	THU	95
<i>Roman Demediuk</i>	Possible use of delta-doped QWs for a THz modulator	THU	96
<i>Pinchas Dahan</i>	Spin selective transport through quantum ring with magnetic impurities	THU	97
<i>Andreea Oprisa</i>	Positron production at ELI-NP simulated using GEANT4	THU	98
<i>Marek Maciaszek</i>	Hybrid functional calculations of the metastable properties of GaCu-related defects in CuGaSe ₂	THU	99
<i>Elisabeth Dietze</i>	Large-scale defect calculations using atomic effective potentials and LATEPP	THU	100
<i>Maria Fedina</i>	Electronic structure calculation of self-defect and silicon in copper iodide	THU	101
<i>Yameng Bao</i>	Dimethylaluminium chloride as Al source in atomic layer deposited Al ₂ O ₃ for silicon surface passivation	THU	102
<i>Arpad Kosa</i>	Defect distribution in InGaAsN/GaAs tandem solar cells	THU	103
<i>Peter Juhasz</i>	Charge relaxation times in pentacene diode estimated by steady-state and transient methods	THU	104
<i>Roberts I. Eglitis</i>	Ab initio calculations of SrTiO ₃ , BaTiO ₃ , PbTiO ₃ and CaTiO ₃ perovskite (001), (011) and (111) surfaces	THU	105
<i>Roberts I. Eglitis</i>	Towards a practical rechargeable 5 Volt Li ion battery	THU	106
<i>Roberts I. Eglitis</i>	First principles hybrid DFT calculations of F center in SrZrO ₃ bulk and (001) surfaces as well as SrTiO ₃ /BaTiO ₃ and SrZrO ₃ /PbZrO ₃ (001) interfaces	THU	107
<i>Roberts I. Eglitis</i>	First principles calculations of the diffusion and aggregation of F centers, as well as bulk and surface H centers in CaF ₂ , BaF ₂ and SrF ₂	THU	108
<i>Maxim N. Popov</i>	Point defect formation and interaction in group IVB transition metal carbides and nitrides	THU	109
<i>Soroush Abbasi Zargaleh</i>	Photoluminescence of nitrogen vacancy defects in silicon carbide	THU	110
<i>Mohammad Amin Baghchesara</i>	Dislocation defects in ZnTe nanowires grown by tellurized of zinc sheets	THU	111
